

# Charter School for Applied Technologies

## EARLY COLLEGE AND CAREER PATHWAYS

*A partnership with SUNY Buffalo State College and SUNY Erie*

### Dual Enrollment at the Charter School for Applied Technologies

#### ***What is dual enrollment?***

Dual enrollment allows students to earn **college credits** for courses they take in **high school**. SUNY Erie's Advanced Studies program and Buffalo States College Access Program (CAP) are dual enrollment options at CSAT. Student final grades for high school courses are reflected on an official college transcript.

#### ***What are the benefits of dual enrollment?***

Dual enrollment courses give students experience with college-level coursework within a supportive high school environment.

Earned dual enrollment credits can be transferred to all universities, saving students time and money spent on college. If they take advantage of all credit-bearing opportunities students can leave CSAT with a full year of college-level courses (30+ credits)!

#### ***How does grading work for dual enrollment?***

Students receive the same grade on their college transcript that they do on their final report card for high school courses. Since final grades will be on a permanent college transcript, it is important that students give their best effort at their best work. *We will monitor grades of all students in dual enrollment courses to ensure successful completion of coursework.*

#### ***How much do courses cost?***

We can offer these courses for FREE to all students thanks to our partnerships with SUNY Erie/SUNY Buffalo State College, the Cullen Foundation, and the M&T foundation!

#### ***What courses can I take?***

We currently offer 17 courses for college credits through dual enrollment, but our offerings are expanding!

### ***Do I have to attend SUNY Erie/Buffalo State?***

No-dual enrollment courses at SUNY Erie and Buffalo State College are transferrable to any institution. Public (SUNY) institutions have agreements within their organization to accept credits. Private institutions have individual policies for accepting transfer credits, so check with the schools you are applying to!

### ***How do I register?***

Students apply to be non-matriculated students at SUNY Erie or Buffalo State College, and then register for their courses in their classes at CSAT with support from their teachers and counselors. CSAT's Dual Enrollment Registration Day for Spring 2022 will be in November 2021.
